GRAY'S SYRUP RED SPRUCE GUM

# Keeping A Rosy Complexion

And A Clear Smooth Skin What Millions Of Women Do.

Medical science says that each one of the billions of red blood corpuscies in your blood stream must have iron or your blood becomes pale, thin and watery. Your lips and cheeks also lose their color, then your stomach, kidneys, hver and heart become weakened, your intestines do not act properly, poisons may be absorbed into your system and your skin thereby becomes rough and muddy looking; dark circles may ap-pear under your eyes, your cheek and facial muscles and tissues shrink, hollows may appear, and you may even look several years older than you actually are. To say the least, the freshness of your youthful beauty is gone.

It is estimated that at least one woman our of every three you meet tacks 100% iron in her blood and is more or less effected thereby. In many cases in addition to the loss of their beauty, they become weak, nervous, unstrung and may be afflicted with melancholy or the blues, or suffer the terrible herrors of nerve

ferce exhaustion.

Nurated Iron is guaranteed in every case to furnish your blody with true red blood food which your blood must have for you to be strong, healthy and vigorous. It is the iron in your blood that puts the color in your chests, helps clear up your skin and give the ruddy glow of health to your complexion. It has been used by millions of women. Get a bottle been used by millions of women. Get a bottle been used by millions of women. Get a bottle teday, take it for two weeks, and if you have not joined the ranks of the thousands who have obtained most surprising health, strength and energy from the use of Nuxated Iron, the

More Pasture from Less Acres. Improvement in the growth and quality of pasture grasses is better insurance of sufficient pasture feed than is increased acreage, says Dr. Ernest Van Alstine, of the agronomy department at the University of Vrmont and Stat Agricultural college The fact that doubling the growth will give as much feed on an acre as grew re on two acres is only a part, in

many cases only a small part of the reason for this. Plants, like human beings, most often suffer and die when they are in a weakened condition. Pestilence, dis-ease and death reap their greatest toll during a famine and children are the

first victims. The same sort of troubles harnss the strayed pasture grasses that have their courageous little heads nibbled off whenever they are high enough to tempt the bite of hungry cattle, When
